WORLD CONFERENCE ON RENEWABLE ENERGY & SUSTAINABLE ENERGY

Renewableenergy2027

June 23–24, 2027 | Valencia, Spain

Conference Theme

"Advancing Sustainable Energy Futures: Innovation, Integration, and Global Impact"

www.renewableenergy2027.com | contact@renewableenergy2027.com

Welcome Message

Welcome to the World Conference on Renewable Energy & Sustainable Energy 2027!

On behalf of NVS International Services, we are delighted to welcome researchers, scientists, academicians, engineers, industry professionals, policymakers, entrepreneurs, and students to join us in Valencia, Spain, on June 23–24, 2027.

As the world moves toward a cleaner and more sustainable future, renewable energy technologies are playing an increasingly important role in addressing climate change, improving energy security, and supporting economic development. This conference aims to bring together experts and emerging researchers to exchange knowledge, present innovative research, discuss technological advancements, and explore practical solutions for a sustainable energy future.

The conference will provide a platform for scientific presentations, technical discussions, professional networking, and interdisciplinary collaboration across the renewable energy sector.

We warmly invite you to participate and contribute your knowledge, research, and experience to this international gathering.

We look forward to welcoming you to Valencia, Spain!

Conference Organizing Committee
NVS International Services

About the Conference

The World Conference on Renewable Energy & Sustainable Energy 2027 is an international scientific and professional gathering focused on emerging renewable energy technologies, sustainable power systems, energy efficiency, clean energy integration, and innovative solutions for global energy challenges.

The event will encourage knowledge exchange between academia, research institutions, industries, government organizations, and technology developers. It aims to highlight scientific developments and practical applications that can accelerate the transition toward low-carbon and resilient energy systems.

Participants will have opportunities to present original research, exchange technical insights, discuss industry challenges, and explore potential research collaborations.

Conference Objectives

01 **Promote** scientific research and innovation in renewable and sustainable energy.

02 **Encourage** international collaboration among researchers, institutions, and industries.

03 **Share** advancements in solar, wind, hydrogen, biomass, and other clean energy technologies.

04 **Discuss** energy storage, smart grids, and renewable energy integration.

05 **Explore** sustainable energy policies, investment opportunities, and commercialization.

06 **Support** young researchers and students in presenting their work.

07 **Build** connections between academic research and industrial applications.

Conference Highlights

Expert Presentations

Discover current research, emerging technologies, and perspectives from invited experts and participating researchers.

Scientific Research Sessions

Present research findings, technical developments, case studies, and innovative energy solutions.

Global Networking

Connect with researchers, academics, engineers, entrepreneurs, and industry representatives.

Sustainable Technology Showcase

Explore clean energy innovations, emerging research, and opportunities for collaboration.

Scientific Sessions and Conference Topics

The conference welcomes original research, technical papers, case studies, and innovative contributions in the following areas.

1. Solar Energy Technologies and Photovoltaic Systems
2. Wind Energy Engineering and Offshore Wind Power
3. Renewable Energy Systems and Applications
4. Hydrogen Energy and Fuel Cell Technologies
5. Biomass, Bioenergy, and Biofuels
6. Geothermal Energy and Hydropower
7. Energy Storage Systems and Battery Technologies
8. Smart Grids and Intelligent Energy Networks
9. Renewable Energy Integration and Power Electronics
10. Sustainable Energy Materials and Nanotechnology
11. Carbon Capture, Utilization, and Storage
12. Energy Efficiency and Conservation
13. Green Buildings and Sustainable Infrastructure
14. Electric Vehicles and Charging Infrastructure
15. Microgrids and Distributed Energy Resources
16. Artificial Intelligence and Machine Learning in Energy
17. Energy Management and Optimization
18. Climate Change Mitigation and Environmental Sustainability
19. Sustainable Energy Policies and Regulations
20. Energy Economics, Finance, and Investment
21. Waste-to-Energy Technologies
22. Circular Economy and Resource Efficiency
23. Hybrid Renewable Energy Systems
24. Grid Modernization and Energy Security
25. Sustainable Cities and Smart Communities
26. Carbon Neutrality and Net-Zero Strategies
27. Renewable Energy Forecasting and Predictive Analytics
28. Energy Access and Rural Electrification
29. Industrial Decarbonization and Clean Manufacturing
30. Emerging Technologies and Future Energy Solutions

The scientific program may be updated to accommodate accepted abstracts and invited presentations.

Why Participate?

Participating in Renewable Energy 2027 offers opportunities to:

01	**Share Your Research**	Present your findings to an international scientific audience.
02	**Expand Your Network**	Build professional relationships with researchers and industry specialists.
03	**Explore New Ideas**	Learn about developments in clean energy technologies and sustainable systems.
04	**Develop Collaborations**	Identify opportunities for joint research, projects, and institutional partnerships.
05	**Increase Professional Visibility**	Introduce your research, expertise, or organization to fellow participants.
06	**Support Emerging Researchers**	Engage with students and early-career professionals.
07	**Discover Industry Perspectives**	Learn about practical challenges, technological applications, and market developments.

Abstract Submission and Presentation Guidelines

Researchers, academicians, scientists, engineers, **and students** are invited to **submit** original abstracts relevant to the conference themes.

01	**Abstract Content**	Abstracts should clearly state the research objectives, methodology, key findings, and conclusions.
02	**Original and Relevant**	Submissions must be original and relevant to renewable energy or sustainable energy.
03	**Submission Details**	Include the presentation title, author names, affiliations, and contact email.
04	**Presentation Format**	Indicate the preferred presentation format: oral presentation or poster presentation.
05	**Review Process**	All submissions are subject to review by the conference scientific committee.
06	**Notification**	Acceptance notifications and presentation instructions will be communicated to the corresponding author.

Suggested Abstract Length

250 – 300 words.

Full-Paper Submission

Full-paper submission is optional unless specifically requested by a publication partner or the organizing committee.

Registration Categories and Fees

Speaker Registration
For accepted oral presentations and speakers.

$649

Delegate Registration
For academic and industry participants.

$749

Student Registration
Valid student identification may be required.

$399

Poster Presentation
For accepted scientific poster presentations.

$549

All fees are listed in USD. Confirm applicable taxes, payment charges, and the final registration terms before publishing.

Registration Includes

- Access to scheduled conference sessions.
- Participation in scientific discussions and networking sessions.
- Conference name badge and participant materials.
- Certificate of participation or presentation, as applicable.
- Access to poster and oral presentation sessions.
- Coffee breaks and lunch, if confirmed by the organizing committee.

Travel, accommodation, visa fees, insurance, and other personal expenses are not included unless explicitly stated.

Register Now

Complete your registration online through our website.

Exhibitor and Sponsorship Opportunities

Renewable Energy 2027 invites clean energy companies, technology providers, equipment manufacturers, research organizations, consulting firms, and industry stakeholders to showcase their products, services, and innovations. Sponsorship offers an opportunity to increase organizational visibility, engage with conference participants, and support international knowledge exchange.

Exhibitor Package
Exhibition space and company visibility, subject to the final package details.

$4,000

Silver Sponsor
Brand visibility and sponsor recognition.

$3,999

Gold Sponsor
Enhanced visibility across selected conference materials.

$5,000

Platinum Sponsor
Premium sponsor recognition and enhanced promotional opportunities.

$5,500

Potential Sponsor Benefits

- Company logo placement on designated conference materials.
- Recognition on the conference website, subject to package terms.
- Opportunities to distribute approved company literature.
- Networking with academic, research, and industry participants.
- Product and technology promotion in designated exhibition areas.
- Acknowledgement during selected conference sessions.

Exact benefits, exhibition space, branding placement, speaking opportunities, and delegate passes must be specified in the final sponsorship agreement.

Publication Opportunities

The conference encourages participants to develop and disseminate high-quality research in renewable energy and sustainable technologies.

Depending on the research topic and publication arrangements, participants may explore opportunities to submit full papers to relevant journals, edited volumes, or conference proceedings.

- Abstracts may be included in the conference abstract book, subject to organizer policy.
- Full papers may be considered by relevant publication outlets.
- Journal submissions may undergo independent peer review.
- Publication fees, editorial requirements, acceptance decisions, and indexing status depend on the respective publisher.

Important: Conference participation or abstract acceptance does not guarantee journal publication or indexing in Scopus, Web of Science, or any other database. Specific publication partners should be announced only after formal confirmation.

Important Conference Information

	Information
Conference	World Conference on Renewable Energy & Sustainable Energy 2027
Dates	June 23–24, 2027
Location	Valencia, Spain
Format	In-person conference
Theme	Advancing Sustainable Energy Futures: Innovation, Integration, and Global Impact
Organizer	NVS International Services
Abstract submission	Contact the organizing committee for submission instructions
Registration	Contact the organizing committee for registration assistance
Website	https://renewableenergy2027.com

Terms and Conditions

01	Registration	Participation is subject to completion of the registration process and payment of the applicable fee.
02	Abstract Review	Abstract acceptance is subject to review and approval by the scientific committee.
03	Payments	Participants should retain their payment confirmation and registration reference.
04	Program Changes	The organizers reserve the right to adjust the program, speakers, session timings, or arrangements when necessary.
05	Travel and Accommodation	Participants are responsible for their travel arrangements, accommodation, insurance, and visa requirements.
06	Visa Matters	Registration does not guarantee visa approval. Participants should apply through the appropriate official channels.
07	Certificates	Certificates will be issued according to the participant's registration and attendance or presentation status.
08	Publication	Any publication opportunity is subject to the relevant publisher's review and acceptance process.
09	Conduct	All participants are expected to maintain professional and respectful conduct throughout the conference.
10	Force Majeure	The organizers will communicate any necessary changes arising from circumstances beyond their reasonable control in accordance with the official event policy.

Cancellation and Refund Policy

Cancellation Date	Refund Eligibility	Refund Amount
On or before February 28, 2027	Full Refund	100% (minus payment charges)
March 1 – April 30, 2027	Partial Refund	50% (minus payment charges)
On or after May 1, 2027	No Refund	0%

- All refund requests must be submitted in writing to the organizing committee.
- Refunds will be processed within 20–30 business days after approval.
- Payment gateway charges and administrative fees are non-refundable.
- In case of program changes or event cancellation by the organizer, an alternative arrangement or full refund will be provided.

Join Us in Valencia, Spain

Valencia combines a vibrant cultural atmosphere with modern architecture and an international outlook, making it an appealing destination for scientific exchange and professional engagement.

Join us for two days of research presentations, technical discussions, networking, and collaboration as we explore innovative pathways toward a cleaner and more sustainable energy future.

We welcome contributions from researchers, academics, students, industry experts, technology developers, and sustainability professionals worldwide.
